

SLIGO TO LINDEN UNDERGROUND LINE PROJECT

An Exelon Company

PROJECT OVERVIEW

At Pepco, we are committed to providing safe, reliable, and affordable energy to our customers and communities in Maryland. As part of our commitment to meet the growing demand for electric service and to enhance the capacity and reliability of our system, Pepco plans to upgrade the electric system infrastructure in the Silver Spring Area between our Sligo and Linden substations. This work will begin in November 2018 and will be completed in May 2021.

STRENGTHENING SYSTEMS & PREPARING FOR GROWTH

The Sligo to Linden Underground Line Project will enhance the reliability of the energy grid in your area. Specifically, this project will:

- Install three new 69kV underground lines between the Takoma and Sligo Substations, improving reliability of Linden and surrounding substations
- Replace aging infrastructure that is near the end of its service life; and
- Upgrade and install new equipment at each substation, further improving reliability for customers.

IMPACTS ON THE COMMUNITY

We understand that work in your neighborhood can cause disruption such as parking restrictions, and Pepco will work to minimize impacts to residents and the community. We are coordinating with Maryland State Highway and Montgomery County to create traffic control plans to ensure the public and workers are safe while keeping disruption to a minimum. Pepco crews are expected to take [one lane] of parking where construction activity is taking place. Proper flagging and signage will be used to minimize traffic delays, however, traffic detours, decreased accessibility to sidewalks, and construction noise may occur. The work

will affect traffic along several roads including Georgia Avenue, Linden Lane, Seminary Road, Hale Place, Fraser Avenue, Montgomery Street, and Brookville Road. Work will typically take place Monday through Friday from 9:00 a.m. to 3:30 p.m. Weekend and night work may occur in select locations, and Pepco will notify customers in advance if this is going to happen.

We will use steel plates at the end of construction activities each day. When work is completed in an area we will use a temporary patch until final restoration is complete. As we proceed with the project, we ask customers to remain clear of worksites so our crews can complete their work safely and efficiently. We appreciate your patience as we complete this important work to improve service in your community.

PEPCO'S COMMITMENT: KEEPING YOU INFORMED

Pepco will keep residents and the community impacted by the project informed every step of the way. If you have questions, please contact us at SligoToLinden@pepco.com or **855-888-9343**. You can also visit pepco.com/SligoToLinden for more information.
